Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: LVL (Laminated Veneer Lumber)

Application: General Application

Topic: Mechanical Properties

Keywords: Checks  
Modulus of Elasticity  
Shear Modulus  
Bending  
Shear Stress

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria  
p. 1267-1273

### Abstract:

Laminated veneer lumber (LVL) is a well-known high-performance engineered wood product obtained by bounding veneers together in grain direction. The peeling process induce lathe checks of the veneer with various depths and spatial frequencies. In this study, the effect of lathe checks on LVL longitudinal modulus of elasticity and...
