

An Innovative Method Based on Grain Angle Measurement to Sort Veneer and Predict Mechanical Properties of Beech Laminated Veneer Lumber

<https://research.thinkwood.com/en/permalink/catalogue1286>

Author: Viguier, Joffrey
 Bourgeay, Christophe
 Rohumaa, Anti
 Pot, Guillaume
 Denaud, Louis

Publisher: ScienceDirect

Year of Publication: 2018

Country of Publication: Netherlands

Format: Journal Article

Material: LVL (Laminated Veneer Lumber)

Application: General Application

Topic: Mechanical Properties

Keywords: Modulus of Elasticity
 Beech
 Grain Angle
 Grading
 Density

Language: English

Research Status: Complete

Series: Construction and Building Materials

Online Access: Free
