

## Numerical Modelling of Nail Laminated Timber-Concrete Composite Floor System

<https://research.thinkwood.com/en/permalink/catalogue1619>

Author: Zhou, Lina  
Chui, Ying Hei

Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: NLT (Nail-Laminated Timber)  
Timber-Concrete Composite

Application: Floors

Topic: Mechanical Properties

Keywords: Numerical Model  
Abaqus  
Four Point Bending Test  
Stress-Strain

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria  
p. 2407-2413

### Summary:

With the trend towards sustainable building design, timber-concrete composite floor systems attract great interest among building designers and developers as an alternative to the profiled steel-concrete deck that are commonly used in commercial construction. The proposed 2-layer composite floor deck consists of a profiled nail laminated timber...
