Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: CLT (Cross-Laminated Timber)

Application: Wood Building Systems

Topic: Design and Systems
Seismic

Keywords: Japan
Time History Response Analysis

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria
p. 3853-3860

Summary:

In this paper, the general process and results of the seismic design on four buildings with Japanese CLT construction after 2014 based on the time history response analysis as the only legal structural design method in Japan at the present moment, are shown. As a result, it is recognized that the buildings has enough seismic performance for the...
