Author: He, Guojing  
Xie, Lan  
Wang, Alice  
Yi, Jin  
Li, Yuanyuan  
Xiang, Lvlin

Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: Timber-Concrete Composite

Topic: Connections  
Mechanical Properties

Keywords: Finite Element Analysis  
China  
Push-Out Tests  
Bolts  
Failure Mode  
Shear Strength  
Shear Capacity

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria  
p. 5250-5256

### Summary:

A timber-concrete composite structure (TCC) is a high strength and low energy-consumption structure, which is developed widely in Europe and America. The objective of this paper is to predict structural response with finite element (FE) analysis and provide shear property of TCC structures with Chinese materials. In this paper, some...
