

Heat Transfer Through Mass Timber Connections

<https://research.thinkwood.com/en/permalink/catalogue1769>

Author: Lawton, Andrea
Emberley, Richard
Torero, José

Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: CLT (Cross-Laminated Timber)

Topic: Connections
Fire

Keywords: Heat Transfer
Boundary Conditions
Finite Element Model

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria
p. 5284-5293

Summary:

The advance in mass timber products has allowed buildings to be revolutionised. Medium rise buildings can utilise these panels as the main structural components achieving suitable strength and rigidity. Structural connections often pose the weakest element in timber construction...
