

Wind-Induced Vibrations in Timber Buildings—Parameter Study of Cross-Laminated Timber Residential Structures

<https://research.thinkwood.com/en/permalink/catalogue1844>

Author: Edskär, Ida
Lidelöw, Helena

Publisher: Taylor&Francis Online

Year of Publication: 2018

Country of Publication: United Kingdom

Format: Journal Article

Material: CLT (Cross-Laminated Timber)

Application: Walls

Topic: Wind
Acoustics and Vibration

Keywords: Dynamic Behaviour
Mass Timber
Natural Frequency
Acceleration
Comfort Properties

Language: English

Research Status: Complete

Series: Structural Engineering International

Online Access: Free
