

Study the Influence of Perpendicular to Grain Compression and Creep in 4 to 8 Storey Lightweight Timber Framed Buildings

<https://research.thinkwood.com/en/permalink/catalogue1925>

Organization: Timber Development Association
Publisher: Forest & Wood Products Australia
Year of Publication: 2018
Country of Publication: Australia
Format: Report
Material: CLT (Cross-Laminated Timber)
Application: Wood Building Systems
Walls
Topic: Mechanical Properties
Keywords: Creep
Compression
Density
Deformation
Language: English
Research Status: Complete
ISBN: 978-1-925213-82-9
Online Access: Free
