

Modelling Alternative Load Paths in Platform-Framed CLT Buildings: A Finite Element Approach

<https://research.thinkwood.com/en/permalink/catalogue2113>

Author: Huber, Johannes
 Publisher: Luleå University of Technology
 Year of Publication: 2019
 Country of Publication: Sweden
 Publication:
 Format: Thesis
 Material: CLT (Cross-Laminated Timber)
 Application: Wood Building Systems
 Topic: Design and Systems
 Keywords: Robustness
 Finite Element Method
 Disproportionate Collapse
 Alternative Load Paths
 Language: English
 Research Status: Complete
 ISBN: 978-91-7790-340-6
 ISSN: 978-91-7790-341-3
 Online Access: Free
