

Innovative Strategies to Protect Concrete Bridge Decks and Cross-Laminated Timber Structures through the Use of Impermeable Overlays

<https://research.thinkwood.com/en/permalink/catalogue2281>

Author: Haynes, Matthew
 Publisher: Oregon State University
 Year of Publication: 2019
 Country of Publication: United States
 Publication:
 Format: Thesis
 Material: CLT (Cross-Laminated Timber)
 Application: Bridges and Spans
 Floors
 Topic: Moisture
 Design and Systems
 Keywords: Concrete
 Waterproofing Membrane Strategies
 Impermeability
 Parking Garage
 Finite Element (FE) Model
 Load
 Language: English
 Research Status: Complete
 Online Access: Free
