

## Bonding Mixed Species for Advanced Biomaterials

<https://research.thinkwood.com/en/permalink/catalogue2321>

Organization: USDA Forest Service Forest Products Laboratory, Michigan Technological University

Country of Publication: United States

Research Status: In Progress

Notes: Project contacts are Xiping Wang at the Forest Products Laboratory, and Xinfeng Xie at Michigan Technological University

### Summary:

This project is expected to reveal if cross-laminated mixed hardwood and softwood species would have bonding properties similar to softwood CLT using commercial adhesives for timber laminating. The results will provide baseline data on adhesion properties of bonding mixed northern wood species.
