

A High-ductility and Dissipative Connection for Earthquake-resistant Cross-laminated timber Structures

<https://research.thinkwood.com/en/permalink/catalogue2403>

Organization: Università degli Studi di Padova, Department of Civil, Environmental and Architectural Engineering

Publisher: Università degli Studi di Padova

Year of Publication: 2019

Format: Report

Material: CLT (Cross-Laminated Timber)

Application: Wood Building Systems

Topic: Connections
Seismic

Keywords: X-bracket
Tension
Shear
Earthquake

Research Status: Complete

Online Access: Free
