

Effect of Selected Factors on the Bending Deflection at the Limit of Proportionality and at the Modulus of Rupture in Laminated Veneer Lumber

<https://research.thinkwood.com/en/permalink/catalogue2494>

Author: Sikora, Adam
Svoboda, Tomáš
Záborský, Vladimír
Gaffová, Zuzana

Publisher: MDPI

Year of Publication: 2019

Country of Publication: Switzerland

Format: Journal Article

Material: LVL (Laminated Veneer Lumber)

Application: Wood Building Systems

Topic: Mechanical Properties
Design and Systems

Keywords: Product Innovations
Technological Innovations
Cyclic Loading
Deflection
Limit of Proportionality
Modulus of Rupture
Wood-Processing Industry Performance

Language: English

Research Status: Complete

Series: Forests

Online Access: Free
