

Enhancing Thermal and Mechanical Performance of Engineered Wood Product Adhesives Using Novel Fire Retardant Nanoclays

<https://research.thinkwood.com/en/permalink/catalogue2550>

Country of Publication: Canada

Publication:

Topic: Fire

Keywords: Adhesive

Fire-retardant

Nanoclays

Research Status: In Progress

Notes: Project contact is Feng Jiang at the University of British Columbia

Summary:

This project investigates a new method to modify the adhesives used in engineered wood products using fire-retardant nanoclays to improve their thermal stability and reduce the potential fire hazards.
