

Fire Code Development - A Literature Review of North American and Chinese Fire Regulations Related to Wood Frame Buildings

<https://research.thinkwood.com/en/permalink/catalogue358>

Author: Dagenais, Christian
Peng, Lei

Organization: FPInnovations

Year of Publication: 2014

Format: Report

Material: Light Frame (Lumber+Panels)

Application: Wood Building Systems

Topic: Fire
Market and Adoption

Keywords: Multi-Storey
North America
China
Fire Safety

Research Status: Complete

Summary:

It can be observed from this review that most fire safety provisions are similar in nature, whether the Chinese, Canadian or American provisions are applied. However, the Chinese code seems to be slightly more restrictive than the North American building codes with respect to wood-use allowances.
