

Remaining Load-Bearing Behaviour of Glued Laminated Timber Beams - Potential in Respect to Structural Robustness

<https://research.thinkwood.com/en/permalink/catalogue494>

Author: Fink, Gerhard
Frangi, Andrea
Kohler, Jochen

Year of Publication: 2014

Country of Publication: Canada

Format: Conference Paper

Material: Glulam (Glue-Laminated Timber)

Application: Beams

Topic: Mechanical Properties

Keywords: Load Bearing Capacity

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 10-14, 2014, Quebec City, Canada

Summary:

In the paper presented here the remaining load bearing capacity and the associated deformation of GLT beams is investigated and its potential in respect to robustness is discussed.
