

Cross-Laminated Timber Roof Panels at the Promega Corporation Facility: Documenting Installation and Monitoring In-Service Moisture Conditions

<https://research.thinkwood.com/en/permalink/catalogue801>

Author: Glass, Samuel
Romanin, Jennifer
Schumacher, Jim
Spickler, Kris

Organization: Forest Products Laboratory

Year of Publication: 2013

Country of Publication: United States

Format: Report

Material: CLT (Cross-Laminated Timber)

Application: Wood Building Systems

Topic: Serviceability
Moisture

Keywords: Moisture
Temperature
Installation Process
Sensors

Language: English

Research Status: Complete

Summary:

The USDA Forest Products Laboratory (FPL) has, for the past two years, been assisting in removing technical barriers to the use of CLT and trying to develop interest in the United States for its utilization. Coincidentally, Promega Corporation, a leader ...
