

## Numerical Modelling of the Hygro-Thermal Response of Timber Bridges During their Service Life: A Monitoring Case-Study

<https://research.thinkwood.com/en/permalink/catalogue2167>

Author: Fortino, Stefania  
Genoese, Alessandra  
Genoese, Andrea  
Nunes, Lina  
Palma, Pedro

Publisher: Elsevier

Year of Publication: 2013

Country of Publication: United States

Format: Journal Article

Material: Timber (unspecified)

Application: Bridges and Spans

Topic: Serviceability  
Moisture

Keywords: Bridge  
Variable Environment  
Monitoring Techniques  
Moisture Induced Stress  
Multi-Fickian Theory  
Finite Element Method  
Abaqus Code

Language: English

Research Status: Complete

Series: Construction and Building Materials

Online Access: Free
