Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: Timber-Concrete Composite
CLT (Cross-Laminated Timber)

Application: Beams

Topic: Connections
Mechanical Properties

Keywords: Adhesives
Lightweight Concrete
Deformation
Vibration
Load Carrying Capacity
Shear

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria
p. 4378-4385

Abstract:

In the presented paper, results of theoretical and experimental investigation of timber-concrete composite members with adhesive connection are described. For the timber part of composite beams Cross Laminated Timber and for concrete part lightweight concrete was used. For the composite connection special adhesive to bounding wet...
