

Connections with Threaded Rods in Moment Resisting Frames

<https://research.thinkwood.com/en/permalink/catalogue1495>

Author: Arne Malo, Kjell Stamatopoulos, Haris

Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: CLT (Cross-Laminated Timber)

Application: Frames

Topic: Mechanical Properties
Connections

Keywords: Moment Resistance
Threaded Rods
Beam Column Connection
Rotational Stiffness

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria
p. 200-208

Summary:

Building owners often state requirements that new buildings shall have open and flexible architecture in order to allow flexible use and future changes. A way to improve timber buildings in that direction is to increase the stiffness of the connections between horizontal and vertical members of the structural systems...
