

## Computer-Aided Methods for the Pragmatic Assessment of the Bearing Resistance of Glued Laminated Timber: Summary of Exemplary Simulation Studies

<https://research.thinkwood.com/en/permalink/catalogue1147>

Author: Frese, Matthias  
 Organization: Karlsruher Institut für Technologie  
 Publisher: KIT Scientific Publishing  
 Year of Publication: 2016  
 Country of Publication: Germany  
 Format: Report  
 Material: Glulam (Glue-Laminated Timber)  
 Topic: Mechanical Properties  
 Keywords: Bending Tests  
 Tension Tests  
 Compression Tests  
 Computer Simulations  
 Language: German  
 Research Status: Complete  
 ISBN: 978-3-7315-0493-1

### Summary:

This book contains experiences and results of computer simulations in the field of research on glued laminated timber. Literature and references to the corresponding methodical approach are given to facilitate the access to the elementary basics. It also contains constructive explanations and critical annotations on modelling glued laminated timber for bending, tension and compression tests. Finally, the relevance of the simulation results for practical issues is discussed.
