

**Performant Connections - A Must for Veneer-Based Products**

<https://research.thinkwood.com/en/permalink/catalogue1535>

Author: Gehri, Ernst  
 Year of Publication: 2016  
 Country of Publication: Austria  
 Format: Conference Paper  
 Material: LVL (Laminated Veneer Lumber)  
 Application: Trusses  
 Topic: Connections  
 Mechanical Properties  
 Keywords: Beech  
 Glued-In Rods  
 Ductility  
 Language: English  
 Conference: World Conference on Timber Engineering  
 Research Status: Complete  
 Notes: August 22-25, 2016, Vienna, Austria  
 p. 891-899

**Summary:**

The structural use of high-strength veneer-based products requires the development of more performant connections, than those actually used. Great development is going on with glued-in bars. Besides high efficiency, adequate ductility may be achieved, resulting in robust structural components...
