Author: Gilbert, Benoit  
Bailleres, Henri  
Zhang, Hao  
McGavin, Robert

Year of Publication: 2016

Country of Publication: Austria

Format: Conference Paper

Material: LVL (Laminated Veneer Lumber)

Application: General Application

Topic: Mechanical Properties

Keywords: Small Diameter  
Hardwood  
Plantation  
Eucalyptus  
Modulus of Elasticity  
Modulus of Rupture  
Reliability  
Capacity  
Spotted Gum

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 22-25, 2016, Vienna, Austria  
p. 873-880

### Summary:

This paper presents the mechanical properties of rotary veneers peeled from small-diameter hardwood plantation logs, recovered from early to mid-rotation hardwood plantations. Two species planted for solid timber endproducts (Gympie messmate - *Eucalyptus cloeziana* and spotted gum - *Corymbia citriodora*) and one species...
