

Study on Seismic Performance of Building Construction with Cross Laminated Timber: Part 14: Deformation of Joints and Fracture Behavior on Three Story Full-Scale Static Load Test

<https://research.thinkwood.com/en/permalink/catalogue981>

Author: Nasu, Hideyuki
Yahaura, Sota
Gosei, Murakami
Goto, Hiroshi
Hamamoto, Takashi
Miyake, Tatsuya
Yasumura, Motoi

Organization: Architectural Institute of Japan

Year of Publication: 2013

Country of Publication: Japan

Format: Journal Article

Material: CLT (Cross-Laminated Timber)

Application: Wood Building Systems

Topic: Seismic
Connections

Keywords: Static Load Tests
Mid-Rise
Fracture Behavior
Full Scale
Seismic Performance

Language: Japanese

Research Status: Complete

Online Access: Free
