

Computer-Aided Methods for the Pragmatic Assessment of the Bearing Resistance of Glued Laminated Timber: Summary of Exemplary Simulation Studies

<https://research.thinkwood.com/en/permalink/catalogue1147>

Author: Frese, Matthias
 Organization: Karlsruher Institut für Technologie
 Publisher: KIT Scientific Publishing
 Year of Publication: 2016
 Country of Publication: Germany
 Format: Report
 Material: Glulam (Glue-Laminated Timber)
 Topic: Mechanical Properties
 Keywords: Bending Tests
 Tension Tests
 Compression Tests
 Computer Simulations
 Language: German
 Research Status: Complete
 ISBN: 978-3-7315-0493-1

Summary:

This book contains experiences and results of computer simulations in the field of research on glued laminated timber. Literature and references to the corresponding methodical approach are given to facilitate the access to the elementary basics. It also contains constructive explanations and critical annotations on modelling glued laminated timber for bending, tension and compression tests. Finally, the relevance of the simulation results for practical issues is discussed.
