

**Assessing the Seismic Performance of Screws Used in Timber Structures by Means of Cyclic Bending Tests**

<https://research.thinkwood.com/en/permalink/catalogue1946>

Author: Izzi, Matteo  
 Polastri, Andrea  
 Nebiolo, Flavio  
 Luzzani, Chiara

Year of Publication: 2018

Country of Publication: Korea

Format: Conference Paper

Material: Timber (unspecified)

Application: Walls  
 Floors

Topic: Connections  
 Seismic

Keywords: Screws  
 Bending Tests  
 Ductility  
 Monotonic Tests  
 Reverse Cyclic Test  
 Seismic Performance

Language: English

Conference: World Conference on Timber Engineering

Research Status: Complete

Notes: August 20-23, 2018, Seoul, Republic of Korea

Online Access: Free
