

Bucking Performance of CLT Composed of 3 Layer-3 Ply

<https://research.thinkwood.com/en/permalink/catalogue944>

Author: Tanaka, Kei
Hiroishi, Taro
Mohri, Takumi
Yuheiri, Mouri
Nakahata, Takumi
Harada, Hiroshi
Inoue, Masafumi

Organization: Architectural Institute of Japan

Year of Publication: 2015

Country of Publication: Japan

Format: Journal Article

Material: CLT (Cross-Laminated Timber)

Application: General Application

Topic: Mechanical Properties

Keywords: Bucking
Compression
Bending Stiffness

Language: Japanese

Research Status: Complete

Online Access: Free

Effect of Opening on Seismic Performance of CLT Panel: Part. 1 Shear Test of H-Shape Specimen Panel

<https://research.thinkwood.com/en/permalink/catalogue943>

Author: Ishiro, Taro
Mohri, Takumi
Yuheiri, Mouri
Nakahata, Takumi
Suzuki, Kei
Harada, Hiroshi
Mori, Takuro
Tanaka, Kei
Kaiko, Naoto
Inoue, Masafumi

Organization: Architectural Institute of Japan

Year of Publication: 2015

Country of Publication: Japan

Format: Journal Article

Material: CLT (Cross-Laminated Timber)

Application: Wood Building Systems

Topic: Seismic

Keywords: Shear Test
Opening

Language: Japanese

Research Status: Complete

Online Access: Free
