Publisher: Scientific.net

Year of Publication: 2013

Country of Publication: Switzerland

Format: Journal Article

Material: LVL (Laminated Veneer Lumber)

Application: Beams

Topic: Mechanical Properties

Keywords: Non-Destructive Testing  
 Static Loading Test  
 Damage Index (DI) Method  
 Loss of Composite Action Index (LCAI)

Language: English

Research Status: Complete

Series: Advanced Materials Research

**Summary:**

This paper presents a novel approach for the determination of the loss of composite action for timber composite systems using only measurements from non-destructive vibration testing. Traditionally, the composite action of a system is evaluated from stat...
