

Influence of the Connection Modelling on the Seismic Behaviour of Crosslam Timber Buildings

<https://research.thinkwood.com/en/permalink/catalogue660>

Author: Sustersic, Iztok
Dujic, Bruno
Fragiacomo, Massimo

Publisher: Springer, Dordrecht

Year of Publication: 2014

Country of Publication: Netherlands

Format: Book Section

Material: CLT (Cross-Laminated Timber)

Application: Wood Building Systems

Topic: Connections
Seismic

Keywords: Multi-Storey
Connection Flexibility
Natural Vibration
Shear Force
Ductility
Ground Acceleration

Language: English

Research Status: Complete

Series: Materials and Joints in Timber Structures

ISBN: 978-94-007-7811-5

Online Access: Payment Required
